

GHAZANFAR ALI

Software Quality Assurance Engineer

PROFESSIONAL SUMMARY

Software Quality Assurance Engineer experienced in Manual and Automation Testing for web and mobile applications. Skilled in test planning, functional, regression, and API testing with strong defect identification. Committed to delivering reliable, high-quality, user-focused software.

WORKING EXPERIENCE

Software Quality Assurance Engineer

- Validated complete end-to-end user journeys, workflows, and UI/UX behavior across multiple rapidly evolving product modules.
- Performed functional, regression, integration, and API testing to ensure authentication accuracy, data integrity, and reliable system interactions.
- Designed and executed detailed manual test cases while developing and maintaining automation scripts for key user flows.
- Identified, documented, and reported defects with clear reproduction steps, logs, and visual evidence to enable fast and effective developer resolution.
- Led QA efforts by planning test strategies, defining test scenarios, prioritizing defects, and supporting high-quality releases in Agile environments.
- Collaborated with cross-functional teams to improve QA processes, mitigate risks, and enhance overall product quality through continuous validation and feedback.

PROJECTS

- Doctor Appliance
- Scaffapp (Under Development)
- Purepredict
- Expense Flow

EDUCATION

 **Bachelors of Science In Computer Science | 2021-2025**
Institute of Space Technology Islamabad

LANGUAGES

English	Proficient
Urdu	Native

TECHNICAL SKILLS

- Manual Testing
- Automation Testing
- API Testing
- Test Documentation
- Bug Tracking & Reporting
- Agile/Scrum
- Performance & Load Testing
- SDLC & STLC
- Security Testing

TOOLS

- Postman
- Selenium WebDriver
- Cypress
- Jmeter
- ClickUp
- JIRA
- MySQL
- SDLC & STLC
- Figma (for UI/UX validation)
- Burp Suite

CERTIFICATIONS

- Foundations of Software Testing (**Coursera**)
- SCS:302 Software Engineering (**Saylor Academy**)
- IBM Cybersecurity Analyst (**Coursera**)
